

WRITING

Choose one of the options below and write a description of a process. Follow the instructions in the study material (p. 35). Use wide range of vocabulary and various grammar structures. Write at least 70 words. Bring your text on a separate sheet (handwritten text is o.k. as long as it is legible) **Please do not use ChatGPT or any other AI tools (including translators).**

Option 1

The treatment of medical waste - textbook – diagram on p. 19

Option 2

How lasers work

Feel free to describe another picture (of the same process), if you find a better/more useful one. However, if you do so, you have to bring in **PRINTED** together with your text (black-and-white picture is fine).
