- 12.4** *Suggested answers*
- The world is facing a looming water crisis. Disputes over allocation have steadily increased in the last decade, and demand has grown rapidly. Water is likely to generate the same degree of controversy in the 21st century as oil did in the 20th. If we take no action now, new conflicts are likely to occur periodically around the world. At the moment, instead of seeking solutions which directly address multiple needs, countries focus a little too narrowly on local issues and typically opt for expensive and inferior solutions. What is needed are decisions which can be quickly implemented and a debate which will seriously consider more than the short term needs of individual states.

- 12.5**
- 1 directly address
 - 2 consider seriously / seriously consider
 - 3 steadily increasing (Although *growing rapidly* might also be possible here, it is less likely given the time period in the sentence.)
 - 4 focuses/focused narrowly / narrowly focuses/focused
 - 5 quickly implemented / implemented quickly
