

Choose the words to complete these extracts from (1) a lecture and (2) a class.

1

belong categories components consist distinct diversity fall feature structure type

'Computer programming languages usually into one of four: imperative, functional, object-oriented and logic. These languages are from one another in how they operate. The of imperative languages is based on commands, you know, "do this, do that thing". Languages such as Fortran and COBOL to this Functional languages of mathematical functions. The of object-oriented languages are commands which are combined with the data to create "objects". The main of logic languages is that they state facts or relations between things. Now, in the case of human languages, is considered a good thing. In the case of programming languages, it suggests we still haven't found the best one!'

'For your end-of-year project, you must carry out a survey of consumer preferences for one product or a type of product. You'll need to a questionnaire, and you'll need to take a lot of factors into account. These include , that is how many males and/or females are in your sample, social , and so on. And also different ; will it just be adults, or young people too? And what about ? They may be retired, but they still buy a lot of things. Also, what about status? Are you going to separate and white collar workers? Or are you also interested in people who are not in , such as , but who are often the ones who buy the goods? And in our multicultural society, don't forget background.'
